COFACTOR: Binds 3 calcium ions.

ENZYME REGULATION: Activated by 200-1000 micromolar concentratic of calcium and inhibited by calpastatin.

SUBUNIT: Heterodiner of a large (catalytic) and a small

"Cloning of m-calpain from mouse nervous system.";
Submitted (JUL-1997) to the EMBL/GenBank/DDBJ dattabases.
-I- FUNCTION: Calcium-regulated non-lysosomal thiol-protease of the cattalyze limited proteolysis of substrates involved in cytoskeletal remodelling and signal tranduction (By simil:
-I- CATALYTIC ACTIVITY: Preferential cleavage: Tyr-1-Xaa, Met.
-I- COFACTOR: BIAGS 3 calcium ions.
-I- ENZYME REGULATION: Activated by 200-1000 micromolar conceled of calcium and inhibited by calpastatin.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             CANZ_MOUSE STANDARD; PRT; 700 AA.

CATALYTIC ACTIVITY: Preferential cleavage: Tyr-|-Xaa, Met Arg-|-Xaa with Leu or Val as the P2 residue.

COFACTOR: Binds 3 calcium ions.

ENZYME REGULATION: Activated by 200-1000 micromolar concessions.
                                                                                                                                                                                                                                                                                                                                            (regulatory) subunit.
SUBCELLULAR LOCATION: Cytoplasmic; Translocates to the membrane upon Ca++ binding.
SIMILARITY: CONTAINS 5 EF-HAND CALCIUM-BINDING DOMAINS.
SIMILARITY: BELONGS TO PEPTIDASE FAMILY C2.
                                                                                                                                                                                                                                   s SWISS-PROT entry is copyright.
